

Training Management

Best Operating Practice

Achieving Best Practice

Just got easy!

Linac's Training Management System is an intuitive web based solution, helping organisations capture and retain critical knowledge and develop a framework of Best Practice. The system drives consistent skills development which directly improves productivity.

- ✓ Administrative effort is automated, leading to considerable cost reductions
- ✓ Organisational structures are mapped easily
- ✓ Role profiling links to specific skills and is supported by automated TNA
- ✓ Upload and link Standard Operating Procedures (SOPs) to roles
- ✓ Link assessment and sign off to role specific skills
- ✓ Automatic Messaging system ensures that all employees are kept up to date
- ✓ Regulatory compliance is ensured through automatic processes
- ✓ Flexible Data Warehousing suite allows complex analytical and ad-hoc reporting

Training Management Best Operating Practice

We can help you achieve competitive advantage and remain viable, sustainable and profitable. Our technology will help you to create a framework for knowledge retention and Best Operating Practice.

Achieving competitive advantage in today's fiercely competitive global markets requires organisations to be lean. It requires your most important assets, your people and your processes to be fully optimised. This requires your people to be fully competent in their role. That is, they need to possess the necessary knowledge, skills and behaviour to drive organisational success.

Linac's Training Management System helps you to effectively capture knowledge, document best practice and train your people consistently. The system can be easily configured to meet your specific demands.

The system integrates seamlessly with existing programmes, workflows and business practices. It addresses the challenges of knowledge retention, skills development and application. It helps to develop a Best Operating Practice framework that continually meets regulatory compliance, reduces risk and drives productivity.

"The Training Management System allows us to adopt a standardised approach to skill, capability development and reporting. I would strongly recommend Linac to any company looking for a training management solution."

Diageo UK & Ireland –Brendan Farrell

Training Management

Best Operating Practice

Solutions are tailored to meet our customers' needs exactly and our flexible approach enables seamless implementation.

The solution drives Best Operating Practice by:

- ✓ Increasing regulatory compliance
- ✓ Reducing risk associated with quality, health and safety and the environment
- ✓ Ensuring consistent skills development and application
- ✓ Retaining knowledge via Standard Operating Procedures (SOPs)
- ✓ Providing a central secure hub for all critical information

Managers can see at a glance the roles and skills gaps associated with each team and individual. The system ensures that all staff training is recorded against a set of standard consistent procedures. The system eliminates the need for paper documentation and thus significantly reduces the administrative effort associated with paper based processes.

We provide a fully managed and hosted service offering the latest in service technologies. Our agile approach enables us to deliver cost effective and fit for purpose solutions.

At Linac we are proud to work with some of the world's leading organisations and our success record is entirely the result of our ability to exactly meet the requirements of our customers.

We understand your needs

“With Linac their approach of structured questioning coupled with a deep understanding of not only IT but Learning and HR issues ensured that our specification was matched exactly to what our needs and not what we thought they were. The winning strategy is Linac’s ability to couple this process with excellent after-sales service and support from a friendly approachable team”.

Brandon Hire – Jim MacCall, National Training Manager

Knowledge management made easy!

Data management tools provide you with the flexibility to continually update information and SOPs to stay current with legislation and best practice.

Reduced development & support costs!

The application is built upon a generic framework and uses existing proprietary software tools to reduce the need for high development and support costs that typically accompany a custom software application.

Efficient & expandable!

The application is easily expanded to incorporate new areas of the business. The organisational mapping tool makes it easy to add new business areas and associate new and existing SOPs to these areas.

Anytime, anywhere reporting!

Live reporting is a standard feature of the application. It is easy to interrogate and evaluate trends and track metrics to make well informed decisions.

Training Management Best Operating Practice

System integration!

We understand that you require a seamless implementation and that each client has unique integration requirements. We can help you to automatically interface with other systems – export, share and update data between systems.

Easy deployment

The systems modular structure enables fast and easy deployment. We work with you to ensure we have captured and understood your specific requirements.

Scalable

The system can be adapted and expanded to grow as your business grows.

“The Training Management System, that was developed to meet specific company needs, has greatly enhanced our process of standardisation and training. The system boasts many capabilities, one in particular being its automated nature which has significantly reduced administration time and resources.”

John Marrow, National Training Manager, Schneider Electric

Features Overview

Administration

Organisational Hierarchy Mapping

- ✓ Map organisational structures
- ✓ Link knowledge and skills to organisational units
- ✓ Set access and permission rights to roles

Role Profiling

- ✓ Build and edit unique role profiles
